

## Programme

0800	<p><b>Registration</b> <i>Grand Ballroom, Level 3, voco Orchard Singapore</i></p>
0900	<p><b>Opening Remarks by Host</b></p> <p><b>Katherine Gizinski, CEO, River Advisers</b></p>
0905	<p><b>Welcome Address</b></p> <p><b>Louis Boswell, CEO, Asia Video Industry Association (AVIA)</b></p>
0915	<p><b>Opening Keynote: What is at Stake for the Satellite Industry?</b> Yet once again the satellite industry faces significant challenges – but is that an opportunity or a threat, or both? Are NGSOs changing the whole market structure – and how are the GSO operators dealing with that, and are the financial markets spooked by all of that? Are software-defined satellites living up to expectations in terms of affordability and delivery schedules? Are we dealing properly with questions of orbital debris? Everyone seems to be looking at Direct to Device – but is that a real market? And what are the latest developments in ground segment – how are they responding to all these challenges? What about the latest spectrum developments? So many questions to be dealt with in just one session!</p>
0945	<p><b>Asia-Pacific Satellite Leaders Roundtable</b></p> <p><b>Panelists:</b>  <b>Mark Rigolle, CEO, ABS</b>  <b>Raymond Chow, Chief Commercial Officer, AsiaSat</b>  <b>Yau Chyong Lim, COO, MEASAT Satellite Systems</b>  <b>Kenichi Shimotsuma, GM, Asia Regional Headquarters &amp; Regional Director, Singapore Branch, SKY Perfect JSAT</b>  <b>Patompob (Nile) Suwansiri, CEO, THAICOM</b></p> <p><i>With Dara Panahy, Partner, Milbank LLP</i></p> <p><b>Session Sponsor:</b></p> 
1045	<p><b>Coffee Break</b></p>

1115	<p><b>Spectrum Update</b> The ITU’s World Radio Conference is held every four years and the last was in late 2023 and the next not until 2027. What happened that might or will affect the satellite industry and what, if anything, can be done about it?</p> <p><b>Fireside Chat: Peng Zhao</b>, VP Policy &amp; Regulatory, <b>Global Satellite Operators Association (GSOA)</b></p> <p><i>With Alexis Martin</i>, Chief Consulting Officer, <b>River Advisers</b></p>
1145	<p><b>Fireside Chat: Indonesia – Seemingly Insatiable Demands for Bandwidth?</b> The launch of the Satria-1 satellite has significantly increased capacity over the country in the past few months and the Nusantara Lima spacecraft will add over 100 Gbps of extra capacity when launched in mid-2024. And it looks like Indonesia will need even more bandwidth in the near term. Will the NSGO systems help to provide that capacity, or do they need much higher bandwidth density?</p>
1215	<p><b>The Customers Talk</b> Streaming, it’s said, is the future but is linear video dead, or still twitching – what effect, if any does that have on expected satellite capacity demand?</p> <p>What’s their view on all of the NGSO/GSO kerfuffle and do they care? Is lower latency really such a big deal? Will Direct to Device be a game changer? And what keeps them up at night?</p> <p><b>Panelists:</b> <b>Paul Mattear</b>, Head of Global SatCom (A&amp;S), <b>Amazon Web Services</b> <b>James Alderdice</b>, VP, Asia Pacific, <b>Lynk Global</b> <b>Martin Arias</b>, Operations Advisor, <b>Wireless Nation</b></p> <p><i>With Gregg Daffner</i>, CEO, <b>GapSat</b></p>
1300	<p><b>Networking Lunch Sponsored by:</b></p> 
1420	<p><b>Keeping Our Feet on the Ground</b> The new generation of software defined satellites and NGSO systems rely significantly on gateways and ground segment as an integral part of the overall network. How is this sector of the industry adapting to changing requirements, and what USPs do they offer? What advice would they give to manufacturers and customers?</p>

	<p><b>Panelists:</b>  <b>Thomas Choi</b>, Executive Chairman, <b>Curvalux &amp; Saturn Satellite Networks</b>  <b>Yossi Gal</b>, VP Regional Sales, <b>Gilat Satellite Network</b>  <b>Kartik Sheshadri</b>, VP - International Operations, <b>Hughes International</b>  <b>Alvaro Sanchez</b>, CEO, <b>Integrasys</b></p> <p><i>With Adrian Potter</i>, VP Business Development &amp; Engineering, <b>ACESAT Satellite Corp</b></p>
1500	<p><b>Where's There's Muck There's Brass</b>  In Yorkshire, the folklore suggests that there's money to be made from junk – and is that also true in space? But the problem is more acute in low earth orbit, with millions of smaller pieces of space junk that could have significant negative effects. How do we ensure that the problem doesn't become a disaster?</p> <p><b>Panelists:</b>  <b>Sue Yeung</b>, Chief Financial Officer and Company Secretary, <b>AsiaSat</b>  <b>Mark Ramsay</b>, Chief Commercial Officer, <b>Space Machines Company</b></p> <p><i>With Kevin French</i>, Publisher, <b>talk Satellite</b></p>
1535	<p><b>Tumult, Volatility, Disruption – What's Next?</b>  2023 was a tumultuous and volatile year in the space industry for financing and insurance, but also a year in which new business models picked up momentum – what's next?</p> <p><b>Panelists:</b>  <b>Dara Panahy</b>, Partner, <b>Milbank LLP</b>  <b>Jacinth Lau</b>, Deputy Director, Industry Unit, <b>Office for Space Technology &amp; Industry, Singapore (OSTIn)</b></p> <p><i>With Jeremy Rose</i>, Partner, <b>COMSYS LLP</b></p>
1610	<p><b>Coffee Break</b></p>
1625	<p><b>The Rocket Scientists</b>  Inflation, supply chain delays, in-orbit failures and dwindling order books in the GSO sector – what (more) could possibly go wrong?!</p> <p><b>Panelists:</b>  <b>Stéphane Vesval</b>, SVP, Head of Sales Space Systems, <b>Airbus Defence and Space</b>  <b>Vivian Quenet</b>, Managing Director, <b>Arianespace Asia-Pacific</b>  <b>Joe Bogosian</b>, VP, Business Development, <b>Boeing Satellite Systems International</b>  <b>Michael Kaliski</b>, Chief Technology Officer, <b>HummingSat, SWISSto12</b></p>

	<p><i>With Peter de Selding, Co-founder and Chief Editor, <a href="http://SpaceIntelReport.com">SpaceIntelReport.com</a></i></p>
1700	<p><b>View From the Top: The Way Ahead - Yes-No-Maybe</b>          Brought back by popular demand and taking into consideration what was shared in all of the earlier sessions, this diverse panel unites industry executives for a high-level talk about the future of the satellite industry and the way ahead. Our panel will share their short- and long-term market forecasts of the satellite business, and cover expected / unexpected milestones, exciting new applications, potential unforeseen challenges and opportunities, and more!</p> <p><b>Panelists:</b>  <b>Neha Idnani</b>, RVP Connectivity APAC, <b>Eutelsat OneWeb</b>  <b>Christian Patouraux</b>, CEO, <b>Kacific Broadband Satellites Group</b>  <b>Sanjay Duda</b>, CEO, <b>Planetcast Media Services</b>  <b>Donald Chew</b>, VP of Sales, APAC, <b>Rivada Space Networks</b>  <b>Katherine Gizinski</b>, CEO, <b>River Advisers</b></p> <p><i>With Louis Boswell, CEO, AVIA</i></p>
1800	<p><b>Closing Remarks Followed by Satellite Industry Forum Cocktails</b>  <i>Grand Ballroom Foyer, Level 3, voco Orchard Singapore</i></p>
